# Exercise 2A

- A questionnaire survey is intended to assess the concept of "health and disability" in Denmark. For this purpose formulate questions/items concerning
  1. The patient (age, gender, socio-demographics, health etc.)
  2. Some of the constructs from the conceptual model in the previous session.
- Create (at least) 3 questions for each of the two points
- Which scale are your responses?
- Nominal, ordinal, interaval or ratio?

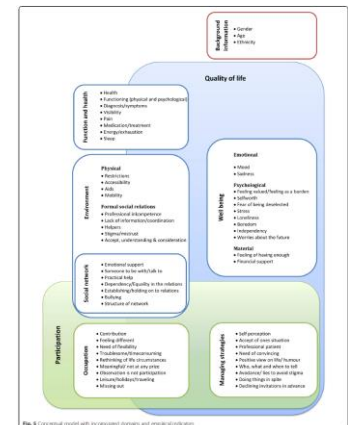

Fig. 8 Conceptual model with psychosocial domains and implementation domains.

## Exercise 2B

### Errors in development of items

#### – What is the problem?

- 1. error
  - Has your child had diarrhoea for more than 2 weeks?
